Purna Chandrala

Technical Business Consultant | Enterprise Software | PLM | Workflow Automation | AI-enabled Delivery

Haar bei München / Munich Region | chandralapurna@gmail.com | +49 163 6369096
English C1 | German B1

Profile

Customer-facing technical business consultant based in Munich with experience in enterprise software implementation, PLM configuration, workflow automation, integration patterns, documentation, UAT, go-live, hypercare and agile delivery. Strong at translating business requirements into practical system solutions and explaining technical topics clearly to business users, technical teams and stakeholders.

Selected outcomes

100%	recent billability in client-facing delivery periods
5+	enterprise implementation projects supported
4 / 2	new joiners onboarded / colleagues mentored continuously
Key	workflow contributor for automation, documentation and delivery topics

Core strengths

Enterprise implementation	Requirements clarification, design sessions, configuration, testing, go-live support and post-go-live stabilization.
Tech-Business interface	Translation of process needs into workflows, user stories, Jira tickets, Confluence documentation and implementation logic.
Workflow & automation	Workflow logic, business rules, PowerShell automation, REST API patterns, SQL procedures and data-heavy implementation support.
Customer-facing delivery	Client workshops, structured communication, issue analysis, training support, onboarding and stakeholder coordination.

Professional experience

Momentum42 GmbH - Technical Business Consultant

Munich, Germany | July 2024 - Present

- Support enterprise software and PLM implementation projects from customer design sessions through configuration, testing, go-live and post-go-live support.
- Translate business and process requirements into workflow logic, configuration rules, Jira tickets, Confluence documentation and customer-facing solution notes.
- Configure workflows, custom tables and business logic using XML, JavaScript, expressions and system-specific configuration mechanisms.
- Build automation and integration patterns with PowerShell, REST APIs and SQL-based procedures for data-heavy implementation and operational support tasks.
- Support UAT, hypercare and AMS by analyzing user issues, validating system behavior, coordinating fixes and stabilizing customer processes after go-live.
- Worked as a key contributor for workflow topics across 5+ projects, maintaining close to 100% billability in recent client-facing delivery periods.
- Onboarded 4 new team members and continuously mentored 2 colleagues, helping them ramp up on workflows, documentation practices and delivery routines.

University of Jena - Machine Learning Researcher

Jena, Germany | Jan 2023 - Jun 2023

- Processed historical forest map data using Python, PIL and OpenCV; fine-tuned deep learning models and structured image datasets for analysis.
- Applied a research-oriented approach to data preparation, validation and repeatable analytical workflows.

GESIS - Data Scientist

Cologne, Germany | 2023

- Digitized and classified historical land-use maps using R and QGIS; created training manuals and supported repeatable data processing methods.
- Contributed to work around Statistical Disclosure Control, metadata protection and documentation in an international research environment.

Purna Chandrala

Technical Business Consultant | Enterprise Software | Automation | AI-enabled Delivery

Professional experience continued

GeoInsight - Data Consultant

Bochum, Germany | Jan 2022 - Nov 2022

- Supported product communication at conferences and helped present technical product value to external audiences.
- Created Figma UI designs to improve product usability and supported data-oriented consulting tasks.

Relevant projects

Semantic Web Data Interface

Protégé, OWL, SPARQL, SQL, PostgreSQL, JavaScript, Spring Boot

- Built a structured data access concept using semantic web technologies and backend database logic.
- Worked with SPARQL, SQL and PostgreSQL to connect data models with user-facing interface requirements.

Digitization and Classification of Historical Forest Maps - Master Thesis

Python, Deep Learning, SQL, QGIS, Miro

- Developed a repeatable workflow for digitizing and classifying historical maps using Python, deep learning model fine-tuning, SQL and QGIS.
- Translated a complex data problem into a structured analytical process with clear documentation and reproducible steps.

Education

University of Bonn - MSc Engineering

Bonn, Germany | Graduated 2023

- Master thesis focused on digitization and classification of historical forest maps using machine learning, SQL, QGIS and structured data preparation.

Skills

Consulting & delivery	Customer discovery, requirements clarification, workshops, stakeholder alignment, product value communication, solution handover, onboarding and mentoring
Implementation	Platform configuration, workflow design, UAT, go-live, hypercare, AMS, Jira tickets, Confluence documentation, training material and user guidance
Enterprise software / PLM	Centric C8 PLM, workflow logic, custom tables, business rules, data imports, configuration concepts and process modelling
Automation & integration	REST APIs, SQL, PowerShell, XML, JavaScript, Python, SQL procedures, integration patterns and data validation
Tools & methods	Jira, Confluence, MS Office, SAP Signavio Process Manager, Camunda, QGIS, agile and sprint-based delivery
AI & productivity	ChatGPT, Claude, Perplexity, Microsoft Copilot, RovoAI, prompt-based analysis and documentation support
Languages	English C1, German B1

Certifications

Product Management Professional - Aha! & LinkedIn | Git Training - Simplilearn | Machine Learning A-Z - Udemy

Leadership & volunteering

Team Leader for ML Content Development at Ignitus | Student Mentor at University of Bonn | Student Volunteer at ESA Living Planet Symposium
